

Lab 1 program

```
#include <stdio.h>
```

```
int main()
```

```
{
```

```
    int totalMarks = 500;
```

```
    int m1, m2, m3, m4, m5;
```

```
    int total;
```

```
    float percentage;
```

```
    // Input
```

```
    printf("Enter marks of 5 subjects:\n");
```

```
    scanf("%d%d%d%d%d", &m1, &m2, &m3, &m4, &m5);
```

```
    // Arithmetic Operations
```

```
    total = m1 + m2 + m3 + m4 + m5;
```

```
    percentage = (total * 100.0) / totalMarks;
```

```
    // Output
```

```
    printf("\nTotal Marks = %d", total);
```

```
    printf("\nPercentage = %.2f%%\n", percentage);
```

```
    // Grade Calculation
```

```
    if (percentage >= 90)
```

```
        printf("Grade : A+");
```

```
    else if (percentage >= 80)
```

```
        printf("Grade : A");
```

```
    else if (percentage >= 70)
```

```
        printf("Grade : B");
```

```
    else if (percentage >= 60)
```

```
        printf("Grade : C");
```

```
    else if (percentage >= 50)
```

```
        printf("Grade : D");  
    else  
        printf("Grade : F (Fail)");  
  
    return 0;  
}
```

Output:

Enter marks of 5 subjects:

85

90

80

75

70

Total Marks = 400

Percentage = 80.00%

Grade : A
